# CLIPPINGS

VOLUME 14 • NUMBER 1 • SPRING 2011

**PTP MISSION STATEMENT - Our mission is to exceed the needs of both our internal and external customers with services supporting the sale and distribution of our products.**

## A Letter from the President

**F**rom the Ryder Cup to the Rose Bowl to Ronald Reagan... the "R's" have it!

Since we last visited on the pages of PTP Clippings, a lot has happened. I had the privilege to attend the Ryder Cup at Celtic Manor and what an amazing venue. What was even more amazing was the job that golf course superintendent James McKenzie (GCSAA member for 13 years) and his staff did keeping the golf course playable. The maintenance staff stayed ahead of the constant rains, keeping the best players in the world on the golf course. Celtic Manor's Twenty Ten course was the brain-child of Sir Terry Matthews, who created the Twenty Ten Course specifically for the 38th biennial match. It was designed to cater to all the elements needed to stage a major sports event, including areas for tented villages, dedicated platforms for hospitality units, space for all the media and television requirements, good spectator viewing points, and safe public access. It combines nine new holes crafted by European Golf Design with nine holes from the original Robert Trent Jones Jr.-designed Wentwood Hills Course, which were extensively remodeled. The Ryder Cup comes back to the U.S. in two years at Chicago's Medinah Country Club. Let me give you a tip...make plans now.

**Eddie Clark**  
PTP President

## PTP Hits Trifecta On Toro National Awards

**B**randon Cole, SCPS, PTP's Account Executive serving the Houston-area golf market territory, received the prestigious Green Blazer Award for his accomplishments in equipment sales. The award is given to a sales representative who has a minimum of three years experience selling Toro products. The award recognizes individuals who are contributing to the industry and bringing enhanced knowledge to their customers.

"Brandon has earned the reputation of doing what he says he will do," said Jim Heinze, Director of Commercial Sales and Training for Toro's commercial business. "He thinks outside the box to make certain his customers have the solutions they need." Congratulations, Brandon!

**Brandon Cole (second from left), won the prestigious Green Blazer Award for his accomplishments in Toro commercial equipment sales.**

**Toro's Steve Snow, Adam Mock, Julie Mock, Phil Burkart and Bill Thornton enjoy a moment at the Toro Awards Show.**

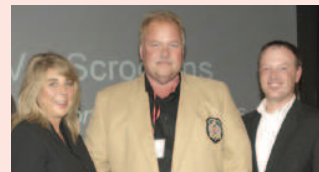

## PTP's Mock...A Toro Irrigation Master

**T**he Toro Master Salesperson Award for Golf Irrigation is the single highest level of recognition at Toro Irrigation. Adam Mock joins a handful of irrigation professionals in very elite company.

Adam has a wealth of experience from working in three different Toro Distributorships over the past 20 years. Bill Thornton, Toro's Western Region Sales Manager said, "In my 30 years at Toro, I have never worked with anyone who works as hard and as smart, as Adam. I am pleased to see Adam's years of hard work and commitment rewarded. He is very deserving of this honor."

## Val Scroggins Wins Sales Award

**P**TP's Val Scroggins received the coveted Toro Sales Award Jacket for his success in exceeding customer expectations in the residential landscape contractor business (RLC). Val is based out of PTP's Houston office and has been serving his customers in Houston for eight years.

**(L-R) Terri Berg, Toro Order Services, PTP's Val Scroggins and Mike Happe, Toro VP and GM of the RLC Business.**

**"For Val, patience is his virtue, persistence his friend. In four years Val doubled his sales for PTP and Toro. He never allows his energy and enthusiasm to be dampened nor discouraged. His dedication to growing his accounts and Toro retail business is key to this success."**

**— PTP's Mike McCue, VP of Commercial & RLC Business**

### Irrigation Conversion Assemblies

# NO GUTS, NO GLORY...NO WATER!

*Make the switch to Toro and we'll make it pay!*

**L**ooking for a simple and cost-effective way to update your Rain Bird irrigation system? Toro offers several options that help you stretch your budget while gaining significant advantages. Known as "the guts" of a sprinkler head, the drive assembly is the key component that impacts coverage, precipitation rates and serviceability.

#### Here's an idea: Conversion Assemblies

The new Toro® R Series conversion assemblies allow you to upgrade your Rain Bird Eagle 900 Series or Eagle 1100 Series sprinklers by replacing only the sprinkler internals while keeping the existing body and piping system intact. These models are based on proven Toro 800S Series and DT Series designs that have been in use on golf courses with Toro irrigation systems for many years.

**Choose from three models, available for immediate shipping:**

**855RB full and part circle – multiple trajectory (24 main nozzle angle options)**

**DT54RB full circle only – dual trajectory (two main nozzle angle options)**

**DT55RB full and part circle – dual trajectory (two main nozzle angle options)**

#### Advantages and Exclusives

- Exclusive adjustable trajectory main nozzle – Trujectory™ allows main nozzle angle adjustment for improved wind performance.

**From now until October 14, 2011, when you buy five Toro 800S Series or DT Series conversion assemblies, Professional Turf Products will give you a sixth one\* free!**

Toro® has designed and manufactured this product to fit within a sprinkler housing made by Rain Bird® Corporation, but Toro's product is not manufactured by or affiliated with Rain Bird. Rain Bird and Eagle are trademarks of Rain Bird Corporation.

- Adjustable part and full circle operation in one. The DT55RB and 855RB provide a part and full circle drive assembly that allows part circle arc adjustment from 40 to 330 degrees.
- Higher pop-up.

- Standard back nozzle capability. The DT55RB and 855RB part circle models allow an additional nozzle to be placed in the back (in addition to the primary part-circle pattern) to water areas outside of the typical fairway or rough.
- The industry's largest nozzle selection. Four nozzle sets are pack-

aged with each of Toro's conversion assemblies, giving you the flexibility to choose different flow rates and distances of throw.

- Constant velocity drive assembly. This assembly maintains a consistent rotation speed across a wide range of pressures and flows to ensure even water application from sprinkler to sprinkler.
- Dura-Seal riser seal. This seal minimizes the flush that occurs when the sprinkler pops up, so less water is thrown around the sprinkler head. It also resists damage from rocks and sand.

#### Solenoid Adapters

Two Toro solenoid adapter assemblies are also available for Rain Bird Eagle 700, 900 and 1100 Series sprinklers:

- The Toro Spike-Guard™ solenoid adapter: The Toro Spike-Guard solenoid draws half the power of traditional solenoids and has a lightning resistance rating of 20,000 volts – three times that of the Rain Bird solenoid.
- The Toro DC latching solenoid adapter: Enables courses to upgrade to the Toro GDC 2-wire system using their existing Rain Bird sprinklers by simply replacing the solenoid.

### CLARK *continued from page 1*

Oh, by the way, Europe won the 2010 Ryder cup 14½ to 13½.

Fast forward to New Year's Day at the Rose Bowl. My TCU Horned Frogs, undefeated (12-0) for the second-straight year navigated the BCS to reach the "Granddaddy of them All" against a tough Wisconsin team out of the Big 10. What a great experience, especially for guys like me who won 10 games during my time at TCU in the late '70's and early 80's. Gary Patterson has done a great job building the program (he wasn't supposed to get the job) and TCU is in the midst of building a new, state-of-the-art football stadium (The House that Gary built!)... The Frogs 21-19 win over the Badgers topped one of the greatest seasons in TCU history and the game came down to one play: a pass that was batted down when Wisconsin tried to make a two point conversion to tie the game with less than two minutes left in the game. Thoughts: Gary Patterson proved to be a great hire – who will you give a chance to today? The Rose Bowl was decided by a great play – what great play will you make today?

Ronald Reagan's 100th birthday was February 6th. Now I realize that not everyone liked "Ronnie", but you can't deny that it's hard to believe it's been 30 years since he took office – where has time gone? You also can't deny one of Reagan's great quotes he uttered when referring to the Soviet Union – it's a rule to live by: "Trust, but verify."

We hope you'll trust your facility to us at PTP. Try us and we'll verify your choice.

Have a great growing season. And Go Frogs!

## Toro Financing Puts You In The Driver's Seat

**T**oro's greens mowers aren't the only thing that flex to meet your needs. Toro's financing options allow you to customize payments to meet your budget and the needs of your facility.

Whether it's maximizing your budget through leasing or the purchase of a long-term asset such as a tractor or an aerifier, let your PTP account executive show you the options and explain the benefits of a financing strategy that can make your entire facility "greener" in all areas.

PTP and the Toro Co. have agreements with four financial services firms to support your selection of Toro equipment and irrigation systems. The partners are De Lage Landen, dba DLL & Agrifin, GE Commercial Equipment Finance, TCF Equipment Finance, Inc., and PNC Financial Services Group, Inc. With the assistance of local Toro distributors, the financing partners will provide customers with competitive rates and multiple sources through which they can acquire funding and develop a customized financing structure.

# Toro's New Turf Sprayer "Lowers The Boom" On Costs, Time

**N**ew for 2011, the 300-gallon Multi Pro® 5800 turf sprayer delivers the enhancements customers asked for — along with accuracy and performance that's second to none. We asked Toro's Multi Pro development team to give us a first look at the new design.

**Q: The Multi Pro 5800 was driven heavily by customer input. Tell us about that.**

**A:** Our goal was to deliver the best-performing sprayer on the market, so it only made sense to ask customers for their feedback. We've spent the last few years gathering customer input and working with the latest sprayer technology to take this product to the next level.

**Q: What's the biggest enhancement you've made with this model?**

**A:** The new spray system is extremely accurate. We've enhanced virtually every aspect of the spray system and optimized the design at each component for better agitation and faster response times. For the

customer, that means the chemical is applied consistently at the right rate from start to finish — which ultimately saves money and makes the treatment more effective.

**Q: Any improvements for high-volume spraying?**

**A:** There's a totally new plumbing system with a six-diaphragm pump that doubles the available flow for the heavy-volume demands of spraying high rates. The new spray tank also has side-mounted agitation nozzles, which "roll" the tank contents to suspend wetttable powders and water-soluble granules. It's a more efficient way to maximize spray-out and material utilization.

The AFC Champion Pittsburgh Steelers practiced at TCU in preparation of Super Bowl XLV as evidenced by the Steelers' logo painted on the football practice fields at TCU.

## Super Bowl Visits PTP Land

**T**he biggest game on the planet came to Dallas-Fort Worth in February when Super Bowl XLV rolled into Cowboys Stadium. Ironically, two teams who have historically given the Cowboys some of their most painful memories squared-off for the Lombardi Trophy at Jerry World.

The Green Bay Packers jumped off to a big lead and held on to defeat the Pittsburgh Steelers 31-25.

PTP and Toro were on the field, too, with equipment and support for the NFL's biggest party. If there's an NFL season next year, Super Bowl XLVI will be in Indianapolis.

### What they're saying about PTP...

"We selected Toro for our lawn care operations not only for the quality of cut of all their mowers but also the reliability and versatility of all of their equipment. The support we receive with repair and technical advice from PTP continues to keep our equipment up and running with minimal downtime." — Robert Sulak, TCU

## Discovery Makes Final Flight

**C**APE CANAVERAL, Fla. — Discovery ended its career as the world's most flown spaceship March 9, returning from orbit for the last time and taking off in a new direction as a museum piece.

Even after shuttles Endeavour and Atlantis make their final voyages in the coming months, Discovery will still hold the all-time record with 39 missions, 148 million miles, 5,830 orbits of Earth, and 365 days spent in space. All that was achieved in under 27 years.

## Your 24/7 Irrigation Security Firm

**T**oro NSN provides comprehensive technical support and priority component and system replacement for its large turf irrigation control customers. Our customers include superintendents and managers of private and public golf courses, municipal parks, sports complexes and facilities. Toro NSN offers fast system troubleshooting, problem-solving, remote diagnostics and friendly advice. You can count on Toro NSN.

We provide training, too. Log on to [www.toronsn.com](http://www.toronsn.com) to learn more.

## The Day Of Wins And Roses – TCU Beats Wisconsin

**W**hen Tank Carder leaped with perfect timing and swatted Wisconsin's final pass to the turf, the TCU linebacker felt as if he got a boost from every player at every school that never even imagined playing in the Rose Bowl.

Sure, these unbeaten Horned Frogs realized they couldn't win the national title. They still celebrated their perfection on the hallowed Pasadena turf in the name of all the little guys outside the monolithic powers of major college football.

Andy Dalton threw a touchdown pass and ran for a score, Carder bat-

ted down a 2-point conversion pass attempt with 2 minutes to play, and third-ranked TCU hung on to beat Wisconsin 21-19 on Saturday.

TCU is the first school from a non-automatic qualifying conference to play in the Rose Bowl since the advent of the BCS, and the Frogs were right at home.

# The All-New Greensmaster® Flex™ & eFlex™ Walk Greensmowers are Electrifying!

*On their way to you in the fall of 2011*

**T**oro's Greensmaster walk mowers will also bring many exciting new innovations in cutting performance and productivity, including:

- The industry's first-ever lithium-ion-powered, all-electric mowers. One charge is sufficient to mow up to nine greens and the mower is practically maintenance free. (Available in 18" and 21" models.)

- An automated easy-turn feature that provides better control and improved productivity.

The EZ-Turn user selectable feature — standard on all eFlex™ models — automatically slows the mower down at the end of a pass and speeds it up again on the return pass, resulting in better control, less turf damage, and a better overall cut.

- An all-new belt-drive transmission powered either by an engine or lithium ion battery technology.

Variable Clip Feature — allows for 6 easily selectable clip options per reel type (8, 11 or 14 blade reel options) — 18 distinct clip rates in all. This feature allows customers to easily optimize the clip rate for the desired height of cut or playing condition.

- "EnergySmart™" design. No gas or oil is required for the revolutionary eFlex™ electric greensmower. Just plug it in overnight and mow without disturbing the environment or anyone at the golf course in the early hours.

### The New EnergySmart™ Label

EnergySmart™ is about efficiency with an eye on environmental sustainability. It's about economic viability and social responsibility. It is customer valued innovation with a "green" twist.

Toro is on a quest to reduce or eliminate key inputs, like fuel and labor, to improve our customers' financial performance and simultaneously improve the environment. The EnergySmart™ label is a way to make our intentions and commitment to sustainability visible to end users.

The Greensmaster TriFlex Hybrid riding mowers and Greensmaster eFlex walk mowers are the first EnergySmart™ labeled products offered by The Toro Company. There are numerous innovations that come together in each product to justify this mark. Examples include custom designed – application specific – components, features that eliminate or reduce service requirements, improve productivity and more.

For more information, call your PTP Account Executive or visit [www.toro.com/golf/newgreensmowers](http://www.toro.com/golf/newgreensmowers).

The Greensmaster TriFlex Hybrid riding mower is one of the first "Energy Smart" labeled products offered by The Toro Company.

An automated easy-turn feature that provides better control and improved productivity is just one of the benefits and improvements to greens mowing offered by the Toro eFlex. Call PTP to set up a demo today.

The Toro eFlex is the industry's first-ever lithium-ion-powered all electric mower, available in 18-inch and 21-inch models.

# PTP Doubles Up On Flowtronex Honors

**P**rofessional Turf Products has been named Distributor of the Year for 2010 by Flowtronex. The DOY Award is given annually to the top distributor in the Flowtronex network. PTP also garnered an additional award from Flowtronex for consistent growth in sales over the past three years.

## FLOWTRONEX®

Flowtronex, a division of ITT Corporation, offers a wide spectrum of packaged pumping systems and pump controls for the golf, landscape, municipal potable & wastewater, retrofit and reverse osmosis/

membrane filtration businesses.

“We are very proud of our partnership with Flowtronex and I am proud of Chuck Watson, our Account Executives and our Irrigation team and the job that they do for our customers,” said Eddie Clark, President of Professional Turf Products.

# Make Toro’s MyTurf Your Key To Operational Success

*“Come in, Houston... Toro has a solution!”*

**N**ot exactly what you’d expect to hear from NASA, but Toro has come up with a tool that will turn your office into Mission Control. It’s Toro MyTurf, a fleet management system that offers a unique combination of tools that increase the efficiency of your

team, adds automation to remove manual tasks all while making it one of the easiest systems to use.

The mission and the result is clear - Increased Productivity. Get your facility off the launch pad today when you visit [www.myturf.com](http://www.myturf.com)!

# Groundsmaster 360 Takes Production To The Fourth Dimension

**D**emonstrations of the new Toro Groundsmaster® 360 rotary mower are producing the same reactions all over the country and throughout PTP Land. Amazement.

People drive it straight to the most challenging areas they have to mow — like tight areas where they usually get stuck, tricky slopes and the smallest obstacles they have to trim around.

That’s when the realization kicks in. It’s an MVP moment – Maneuverability, Versatility and Power all on display as customers see the machine maneuver into places their other equipment never could. The Groundsmaster 360 — in essence — combines the cutting performance of an out-front rotary and the maneuverability of a zero-turn rider.

“During the development process, we took the Groundsmaster 360 to four continents for customers to test-drive,” adds Kevin Conry, the Sr. Marketing Manager for Rotary Mowers. “Our goal was to solicit constructive and actionable feedback on the design.”

**Here’s what caught their immediate interest and attention:**

- **Tight, 360-degree turning without turf damage.**
- **The Groundsmaster 360 is noticeably more maneuverable.** The operator can literally turn around a blade of grass without tearing up your turf.
- **Excellent hillside traction and stability.**
- **More cutting, less trimming.**
- **The Groundsmaster 360 maneuvers in-close around trees and fences, so there’s less trimming to do later.** You can even steer around tight spaces without having to shift into reverse ... and when you’re moving forward, you’re cutting grass.
- **Easy operation.**
- **Intuitive controls and a con-**

**venient steering wheel make it easy for almost any operator to jump on and do a safe, thorough job with minimal training.**

- **Power and versatility.**
- **The Groundsmaster 360 handles like a smaller machine yet packs the serious power of a larger one,** thanks to a 36-hp Kubota® diesel engine. Fast, efficient and versatile, it features a 72-inch width of cut – at 1 to 6 inches to fit your needs.

- **Seasonal options for year-round use** – Ready for snow or summer heat.

Options include Toro’s patented QAS™ (Quick Attach System), which makes easy work of changing seasonal attachments like a snow thrower, rotary broom or angled blade. You can also choose an all-season, factory-installed safety cab with A/C and heating.

Watch it in action and hear what other turf pros have to say at [www.toro.com/360](http://www.toro.com/360). Then schedule a demo with PTP to experience the unique benefits of the GM360 Quad-Steer Rotary Mower.

## What they’re saying about PTP...

“Midland College has been purchasing Toro equipment from Professional Turf Products since January 23, 2003. This, in my opinion, was the best move we have made in the Grounds Department. PTP has consistently given us service far and above what we ever expected. We have had bad service from other suppliers, so good service was a new thing to Midland College. Everyone at PTP, from the person answering the phone to the mechanic working on the equipment, does all that is possible to solve whatever problem correctly and the FIRST time.

At this time we have 4 Toro mowers, 2 Workman vehicles, a new spray rig and Toro Sentinel central irrigation system, all purchased through PTP. We have an Toro Infield Pro infield groomer on order for our softball and baseball fields. If at all possible any and all new equipment we purchase will be red and say Toro on the side and be from PTP.

I personally consider the people at PTP to be my friends. I know business is business and sales are the driving factor for any business, but the people at PTP make me feel like I am the only thing that matters when I speak to them. This is customer service at its finest.”

— Terry D. Kirkland  
Grounds Superintendent  
Midland College

PROFESSIONAL

## PTP Service Programs Turn The Wrench On Repair Costs

**T**ake control of your equipment maintenance by putting PTP's Field Service Team to work. **Call PTP's Service Department today at 888-PRO-TURE, Option 2.** Get signed up today for PTP's Field Service Program and get all these services:

**Priority Service** – When you call in, your service call goes to the head of the line.

**Increased Productivity** – PTP mobile technicians will visit your facility for scheduled maintenance and repair.

**Cost Savings** – Reduce parts and repair expenses by utilizing our service solutions. Customary "trip charges" are waived under our service agreement.

**Customized Service** – PTP will establish a service solution that meets

your specific maintenance needs.

**Communication** – Professional Turf Products will thoroughly inspect your equipment and communicate our findings during each visit. We will help educate your staff with daily maintenance and operational practices which will maximize the life of your equipment.

**Expert Technicians** – All PTP technicians are Toro factory-trained and certified for evaluating, diagnosing, repairing and maintaining all brands of equipment.

**EETC Trained & Certified** – PTP is committed to providing superior service to our customers. PTP independently certifies all technicians to ensure our customers receive the highest quality service available.

**PTP Service Programs...Membership has its Privileges!**

## SAMSUNG Mobile 500 Gets Kenseth Back On Winning Track

**M**att Kenseth, in his No. 17 Crown Royal Ford, snapped a 76-race winless drought with a dominant performance in the Samsung Mobile 500 on April 9th. The crowd of 168,400 witnessed the first-ever night NASCAR Sprint Cup Series race in the 15-year history of Texas Motor Speedway.

**TLC™**  
Toro Loyalty Counts  
PARTS REWARD PROGRAM

**I**f you're running on a tighter budget these days, you are not alone. But you still have to maintain a playable course, which depends on your mowers, aerators and other machines to stay up and running. Here are two ways to help get the most from your equipment investment over the long term.

### 1. Register for the Toro Loyalty Counts (TLC) Parts Reward Program.

This is an easy way to get extra benefits by performing regular maintenance on your equipment with parts/products from Toro. Here's how it works: After registering for the TLC program, you earn points based on your purchases of commonly used parts (e.g., belts, filters, tires, etc.). The points you earn can be redeemed for a variety of rewards, including:

- Credit toward future parts and/or irrigation purchases
- Discounts on factory service schools or other educational of-

ferings through Toro University

- Subscription dues that can be applied to myTurf™ fleet management software services
- Hand-held consumer products like blower/vacs and pruners
- Toro apparel and other merchandise

### 2. Choose extended-life parts.

While it is true that premium parts typically require a greater up-front investment, it is also true that the longer life of an extended-life part can frequently offset the higher initial cost. Not only will you buy replacement parts less often, but you'll also save on labor, since premium parts typically require fewer change-outs and less frequent adjustment during use. The result is a positive return on investment that can really add up over time.

What's a premium part? One example is Toro® TITAN® tines for your aerator. They last approximately three to four times longer than standard tines.

## Austin CC Capitalizes On LYNX Control System

**A**ustin Country Club's Bobby Stringer was looking for an upgraded solution for his irrigation control system.

The answer was the Toro Lynx system.

Lynx was offered to him by PTP and Bobby likes the way it works. The advanced abilities of the system that's a Windows-based platform, allows for layered views of all the important data used on a golf course.

**Here's a few of the features that Bobby enjoys every day:**

- All the information you need, in one place. Lynx combines all essential data and intuitively presents the information you need at a glance.
- Superior course map editing and creation.
- Unsurpassed integration with other system components, including weather stations, electrical systems

and smart phones.

- Instant access to real-time information.
- Comprehensive reporting which simplifies your decisions.
- Easy set up and customization of your irrigation system.
- Enhanced system troubleshooting and 24/7 software support from Toro's NSN®.
- Toro VP Satellites, the most advanced satellites on the market.

- Toro 800 Series sprinkler heads with trajectory adjust and full circle/part circle capabilities. Superintendent Stringer and his staff also utilize two Flowtronex pump stations, with which Toro Lynx software integrates easily.

## Ponies Sport Blue and *Toro Red* at SMU

**PTP and Toro are the choice of the SMU Mustangs.**

*Ann Allen, Assistant Director of Landscape Management at SMU says:*

**“I** have a crew of 12 grounds-keepers and we all use Toro vehicles purchased from Professional Turf Products. We could not do our job without them. They are perfect for everything we do.

We haul plants, mulch, trash bags, tree branches and anything else that 150 acres of landscape might produce.

The Toro Workman vehicles are electric so we don't have to bother with gas or exhaust. They easily jump curbs and drive over all types of terrain.

The hydraulic bed makes dumping mulch out easier. It's easy to dump the contents of the bed into a backhoe. We use them hard for eight hours a day and we rarely have maintenance issues.”

**Ann Allen (far left), Assistant Director of Landscape Management at SMU, and her crew helped the Mustangs to their first bowl victory in 25 years at the Armed Forces Bowl.**

### FEATURES

- EdgeMax bedknives stay sharper longer, allowing for a crisper cut and healthier turf
- Part cost is reduced with EdgeMax bedknives that last up to two to three times longer than standard bedknives
- Significantly less maintenance time is required for backlapping, grinding, replacing and adjusting EdgeMax bedknives, saving labor time and money
- Greens EdgeMax bedknives are manufactured from solid hardened tool steel
- Fairway EdgeMax bedknives contain an edge insert of hardened tool steel
- EdgeMax bedknives are available in Micro Cut, Tournament Cut and Fairway Cut sizes to meet all your reel mowing needs

Part No.	Cut Description	Height of Cut
117-1530	18" Micro	1/16" - 3/16"
117-1532	18" Tournament	1/8" - 1/2"
115-1880	21" Micro	1/16" - 3/16"
115-1881	21" Tournament	1/8" - 1/2"
112-7475	21" Fairway	3/8" - 1"
108-9095	22" Fairway	3/8" and up
112-8910	27" Fairway	3/8" and up
112-8956	32" Fairway	3/8" and up

### Now available for Greens and Fairways!

The EdgeMax bedknives are just what you have been looking for to better utilize your reel mowers. These bedknives are manufactured from hardened tool steel for superior edge retention, performance, and long life. With EdgeMax bedknives you can significantly reduce maintenance time and overall cost without sacrificing quality of cut or health of the turf.

**Call your Toro distributor at 1-800-803-8676**

## EDGEMAX QUALITY, EDGEMAX CUT... EDGEMAX QUALITY OF CUT... ONLY AT PTP

**T**oro EdgeMax bedknives are just what you have been looking for to get more out of your reel mowers. Toro's latest contribution to cutting science starts with hardened tool steel for superior edge retention, performance and long life.

With EdgeMax bedknives, you can reduce maintenance time and overall cost without sacrificing quality of cut and health of the turf. EdgeMax--now available for greens and fairways. Call PTP today at **888-PRO-TURF**, Extension 1 and get the edge today!
