

BUY FIVE TORO® CONVERSION ASSEMBLIES,
GET ANOTHER ONE

FREE

TORO CONVERSION ASSEMBLIES MAKE UPGRADING YOUR SPRINKLERS EASY.

Professional Turf Products wants to help your golf course—and your bottom line—benefit from the precision, adjustability and efficiency of the latest Toro sprinkler technology... all without having to dig up your sprinkler bodies.

With easy-to-use Toro conversion assemblies, you just quickly plug in upgraded sprinkler components from above.

From now until October 14, 2011, when you buy five Toro 800S Series or DT Series conversion assemblies, Professional Turf Products will give you a sixth one* free!

Start enjoying exclusive Toro advantages like these:

- Patented TruJectory™ allows main nozzle angle adjustment for improved wind performance, obstacle avoidance, such as low hanging branches, and radius adjustment for precise water placement.
- Part- and full-circle arc in one sprinkler allows you to simply and economically adjust the area of coverage to match seasonal needs or meet water use requirements.
- The industry's most flexible nozzle selection allows you to individually adjust the water applications to suit every application on the course. Being threaded in from the front allows for easy replacement with no extensive disassembly required.
- Constant velocity drive system provides consistent rotation speeds across a wide range of pressures and flows to ensure even water application from sprinkler to sprinkler.
