

BUY FIVE NEW TORO® R SERIES
CONVERSION ASSEMBLIES, GET ANOTHER ONE

FREE

ADDING TORO EFFICIENCY TO YOUR EXISTING RAIN BIRD® SYSTEM IS EVEN MORE INTELLIGENT.

Professional Turf Products can help you upgrade your Rain Bird® irrigation systems into precise, adjustable, high-efficiency irrigation systems, thanks to new conversion assemblies from Toro. These new sprinkler internals allow golf courses with Rain Bird® Eagle™ 900 and 1100 Series sprinklers to stretch their budgets and easily and economically upgrade their systems.

The conversions get even more exciting with Professional Turf Products' special introductory offer: from now until October 14, 2011, when you buy five Toro R Series Conversion Assemblies, you get a sixth one* free!

Qualifying conversion assembly models:

- 855RB model with 24 trajectory positions and a full/part circle drive assembly.
- DT55RB with dual trajectory nozzle and full/part circle drive.
- Economical DT54RB with dual trajectory nozzle on a full circle drive.

All models include four nozzle sets to cover a wide range of flow and radius requirements, plus ratcheting riser, radius reduction screw and more.

With Toro's new conversion assemblies, current Rain Bird® Eagle™ 900 and 1100 Series users can now realize the benefits that Toro's sprinklers provide while dramatically increasing the efficiency and flexibility of their current irrigation system. These innovations include:

- 1 Full inch and one-half pop-up height over Rain Bird® Eagle™ 900 and 1100 Series sprinklers.
- 2 Patented TruJectory™ allows main nozzle angle adjustment for improved wind performance, obstacle avoidance, such as low hanging branches, and radius adjustment for precise water placement.
- 3 DuraSeal riser seal keeps rocks, grit, clippings and sticks from fouling your sprinklers.
- 4 Part- and full-circle arc in one sprinkler allows you to simply and economically adjust the area of coverage to match seasonal needs or meet water use requirements.
- 5 Constant velocity drive system provides consistent rotation speeds across a wide range of pressures and flows to ensure even water application from sprinkler to sprinkler.
- 6 Optional SpikeGuard™ solenoid which draws half the amperage and provides 3x the surge protection of competing products.
